

HIRING: Backend Java Developers – two positions

Dear All,

We are looking for talented and passionate developers, eager to join our international SCRUM teams developing the software products of the company. We are committing to a new challenges and exciting development opportunities every day in addition to our strong employee benefits.

The job scope is to:

- Develop a range of award-winning solutions for our learning management platform.
- Analyse business requirements, design technical solutions based on multiple technologies, implement, and test them.
- Take part to all development phases and continuously improve our processes/technologies.
- Adapt to complex projects, build know-how, share it, and coach your colleagues.

The competencies you need

- At least one and a half year of experience in development, preferably in an agile environment.
- Solid knowledge of Java EE and web applications using J2EE (servlets, JSP, custom tags).
- Experience of continuous integration (Jenkins, Ant/Gradle), while deployment architecture or micro-services architecture is an advantage.
- Experience with web/application servers and databases: Oracle/MS SQL/PostgreSQL.
- Good knowledge of OOP, design patterns and ability to produce high-quality code.
- Knowledge with testing tools and frameworks (JUnit, Selenium, Karma) would be an advantage.
- Understanding of front-end technologies: HTML5/CSS3, JavaScript frameworks.
- Fluency in English is compulsory.

What you can expect?

- Full time job
- Competitive Salary
- Experienced and enthusiastic colleagues support
- Exciting projects for major brands
- Constant learning
- Additional Health Plan
