Mobile/Flutter Developer (m/f)

ASEE SOLUTIONS is looking for motivated student who would like to join our young and dynamic team of software developers in our Security&Compliance department.

This challenging job position involves development of Mobile applications in the field of banking and fintech industries for some of the biggest players and banks in the region and worldwide. Our focus is on authentication and payment solutions that are among the top solutions in our region.

Main tasks include:

• Work on development of Mobile applications and frameworks in the banking field
• Design & implement new app modules based on the product requirements using Flutter framework
• Work with highly skilled professionals in interdisciplinary team of iOS, Android and Java developers
• Defining, writing and executing test scenarios

We are looking for students who have:

• Basic knowledge of the Android and/or iOS operating system and tools and technologies for developing Android and/or iOS applications
• Basic knowledge and interest in learning about Flutter
• Ability and willingness to work as part of the team
• Openness to continuous acquisition of new skills and competencies

It will be considered a distinct advantage if you have:

• Experience with platforms such as Android, Java (server side) and/or Flutter
• Experience with development of mobile applications (Android and/or iOS)

What can we offer:

• Flexible working hours
• Remote work options
• Mentorship and Buddy program
• Work in a young and stimulating working environment
• Use of advanced technologies and systems
• Education in desired field
• Team building events
• Refreshments in the office
• Possibility to participate in PassSport program

If you are interested to learn more, feel free to send us your CV at ivona.smijulj@asee.io
